

RESOLUTION #: 19

TITLE: Marine Wilderness

WHEREAS: The land and the sea are linked by:

- The weather that blows across them;
- The water that evaporates from the sea, falls on the land, and returns to the sea;
- The birds that fly above both;
- The migratory fish that inhabit both;
- And the human species that fish in the sea, inhabit coastal regions, and consume the Ocean's bounty.

THEREFORE: In gratitude for the presentations and discussions on marine wilderness at the 8th World Wilderness Congress;

RESOLVED: That at all future World Wilderness Congresses, the concept of wilderness be expressly understood to include the marine environment.
